

Can you afford a sick computer day?

Simply installing Anti-Virus Software is not enough.

Adding ReMove it to your network is a complete Anti-Virus Solution—monitored and maintained by Partners you Know and Trust.

Keeping your technology healthy is critical to running your operations efficiently. As malware, spyware and viruses become more prevalent it is imperative that your anti-virus is constantly monitored and maintained. The **ReMove it Managed Anti-Virus** solution from Design Data Corporation provides a team of technicians that are proactively watching your anti-virus to help avoid computer sick days.

-  Industry Leading Anti-Virus Software
-  24/7 Anti-Virus Definitions and Software Updates
-  Virus Definition Management and Alerting
-  Removal of Quarantined Items
-  Remotely Perform System Scans
-  Detailed AV Reporting for better Management
-  Reduces Stress on the Server

Ask yourself the following Questions...

- 🐛 Are all of your computer's Anti-Virus Definitions up to date?
- 🐛 When is the last time your computer has been scanned for viruses?
- 🐛 Are quarantined items still sitting on your computer or were they removed?
- 🐛 When does your current Anti-Virus Subscription expire?

Client	Site	Device	Date of Event	Status	Threat Name	Number of Traces	Event Type

Real Time 24/7 Anti-Virus Reporting:

- Threat Reports
- Protection Reports
- Quarantine Reports

Not your Traditional Anti-Virus Solution.

Unlike traditional anti-virus solutions, ReMove it Managed Anti-Virus, allows Design Data technicians the ability to notify you if your AV is out of date, if items were quarantined and need to be removed, or even remotely run a deep or quick scan to clean your PC up. ReMove it provides you with the peace of mind that your technology partners are proactively monitoring your environment to keep you
